

# BOUNDLESS ENERGY.

The demand for energy that allows people to live their lives will continue to increase over the next decade and beyond. While global dynamics invariably ebb and flow, the need for energy infrastructure will continue to be driven by population expansion, improvements in quality of life, more difficult exploration and the need to upgrade aging infrastructure. This in turn prompts the need for customers to partner with companies they know and trust who have the expertise, the technology, the resources and the global presence to meet the challenges of the infrastructure projects around the world.

Boundless passion.  
Boundless presence.  
Boundless performance.

**At Dresser, our business is about energy.** We are one of the world's leading providers of innovative, reliable and affordable equipment and services for mission-critical applications in global energy infrastructure. We are a growing, successful company with the resources, the technology leadership and the internal capability to meet the demands of the energy business. We've built a reputation for delivering proven results and establishing long-term relationships with leading companies throughout the global energy infrastructure. Customers rely on Dresser to perform under the most demanding conditions and in the most critical applications — from production, transport and refining to power generation and retail distribution.

Beyond the ever-expanding markets we serve, we're also driven by the combined energy of more than 6,000 passionately committed employees in every region of the world. Sharing new ideas. Embracing personal accountability. Demonstrating integrity and respect in everything we do. And always developing ways to help customers perform better.

This is an exciting time. We're well positioned to capitalize on the opportunities of our ever-changing world — helping customers succeed with proven solutions and keeping our business strong.

**That combination of passion and experience is the key to unleashing boundless potential.**

*In Thailand, we're partnering with customers like Chevron. Our engines can provide greener power — reducing emissions and contributing toward environmental sustainability in Southeast Asia.*

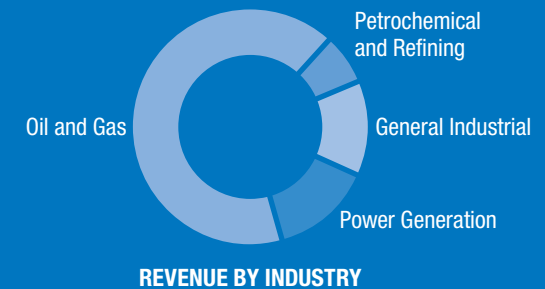

## You don't just produce a reputation for results. You earn it.

**Innovation. Reliability. Efficiency.** Leading companies from across the energy infrastructure value chain look to us for highly engineered products, systems and solutions that produce results. We back these diverse businesses with unrivaled support — whenever and wherever it's needed.

Our relationships with most of the world's top oil and gas companies go back decades. The same goes for the engineering project firms that design energy plants around the globe. In fact, more than half our business originates from outside of North America. Few companies can match our record for reliable operation under the most extreme conditions. From below sea level to the highest altitudes, from the equator to the Arctic Circle, Dresser stands for proven performance.

### DRESSER BRANDS

- **Dresser Wayne® is a global leader and innovator in the design and manufacture of fueling technologies, equipment and payment solutions.**
- **Dresser Masoneilan® is the leading global partner in process control valves delivering customized products, services and diagnostic solutions for oil and gas, power and process applications.**
- **Dresser Consolidated® is the leader in pressure and safety relief valves with the trusted expertise to provide and service reliable flow safety systems in critical applications around the world.**
- **Dresser Waukesha® is a leading manufacturer of natural gas engines that deliver clean, cost-effective power for gas compression, power generation and mechanical drive applications.**
- **Dresser® is a leading provider of innovative, reliable and cost-effective equipment and services for mission-critical applications within the global energy infrastructure.**
- **Dresser Roots® is the source for air and gas handling and metering equipment through the advanced design and manufacture of positive displacement and centrifugal air and gas products, services and solutions.**

*Santos, Australia's largest power company, depends on Dresser equipment to deliver power to the people of Queensland.*

## Our focus: long-term relationships that move business forward.

**At Dresser, putting customers first isn't just a goal.** It's part of our culture. We'll do whatever it takes to help drive performance, efficiency, growth and safety — whether it's providing products or aftermarket support, such as OEM parts, diagnostics, service and repair.

One of Singapore's largest combined-cycle power plants turned to Dresser for actuators, pressure reduction stations and other critical components. Bechtel has specified Dresser equipment as they engineer

industry-leading processing technology for LNG projects from Equatorial Guinea to Qatar to Texas. And in the United States, our valves will enable a new refinery to produce cleaner-burning fuels.

Our commitment to customers has been our strength for more than a century.

<b>OIL AND GAS</b>	Exxon Mobil	BP	Petrobras
<b>ENGINEERING AND CONSTRUCTION</b>	Aker Solutions	Bechtel	JGC
<b>POWER AND NATURAL GAS</b>	Chevron	CNPC/SINOPEC	Gujarat Gas India
<b>FUEL RETAILERS</b>	Shell	Tesco	ENI

*We've developed long-standing relationships with customers of all sizes — from the world's top energy companies to thousands of regional businesses.*

# BOUNDLESS PURSUIT.

*In the Middle East, the zero-flare policy drives demand for our natural gas solutions — including flow control, power generation and compression, gas metering and measurement systems.*

## We also help customers refine the way they work.

**Our reputation for industry-leading performance** — from operational excellence to quality standards — starts with an uncompromising focus on continuous improvement.

At Dresser, good is never good enough. We've instilled Lean and Six Sigma methodologies throughout our company, constantly looking for ways to improve. Whether it's raising efficiency, reducing costs or improving on-time delivery. In fact, we've received more than 120 regulatory and industry approvals or certifications — and are on track to be ISO 14001 certified at all of our major sites worldwide by 2010.

The pursuit of excellence doesn't stop there. We're also proud to help customers unlock unrealized value by implementing green

processes and systems — such as exhaust recirculation, pipeline integrity, and zero-bleed technologies that reduce or eliminate emissions; solar pumps and vapor recovery meters that provide alternative power sources; and products that reduce noise pollution.

Internally, our environmental, health and safety programs demonstrate our passion and progress toward reducing our own carbon footprint, improving employee safety and meeting new regulatory requirements.

# BOUNDLESS PRESENCE.

*In Holland, Dresser equipment powers one of the country's largest greenhouses. The same power system is versatile enough for use in developing nations that require reliable operation with little maintenance.*

## It takes passion and expertise to power the global marketplace.

**At Dresser, energy knows no borders.** We are wherever and whenever customers need us, with a presence in more than 100 countries — including manufacturing, sales, customer support and service facilities on five continents.

Our extensive sales presence and customer support is critical for our customers. This ensures responsive local service, parts repair and replacement — as well as immediate 24/7 access to Web-based resources. Plus, we're constantly evaluating market changes and opportunities for improvements as we look ahead to the future needs of our customers.

With our strong multinational presence and growth, Dresser also offers boundless opportunities. We're constantly looking for the best and the brightest. Our record of performance, growth and organizational stability attracts some of the most talented engineers, managers, manufacturing professionals and support people in every region of the world. The result: a diverse organization with deep, technical expertise that encourages performance and innovation.

*Our latest pay-at-the-pump technology gives fuel retailers a cost-effective way to meet new and upcoming secure payment standards.*

## Delivering new breakthroughs for more than a century.

Few companies can match our track record for setting industry standards. Since receiving our first patent back in 1880, we've consistently brought customers innovative technologies and processes that raise performance and efficiency to new heights.

Inventing the world's first metered pump, as well as the latest payment systems and technology. Developing control valves to reduce environmental emissions. Introducing positive displacement blower technology that reduces costs. Creating the first eccentric plug rotary globe valve. Pioneering the use of landfill gas to fuel engines. Just a few ways Dresser's technology excellence has helped customers grow and improve the way they do business.

The Dresser name is known around the world for technology innovation that helps customers improve their business performance. To learn more about our history of innovation, including a timeline of industry firsts, visit [www.dresser.com](http://www.dresser.com).

### RECENT INNOVATIONS

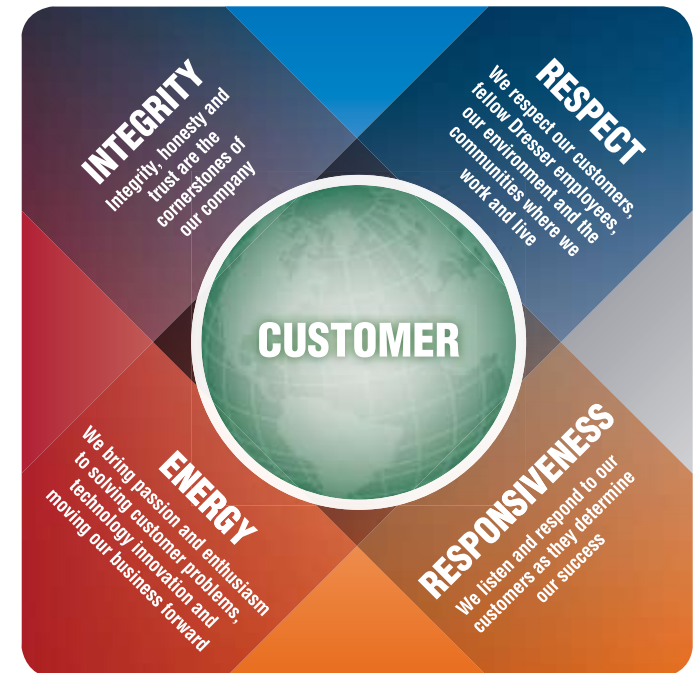

- *SVI® II Emergency Shut Down (ESD)*
- *iCIP™ intelligent solar chemical injection pump*
- *IntelliView® air control systems*
- *APG™ high-efficiency power generation*
- *Online valve diagnostics (OVD)*
- *iX™ Technology Platform*
- *VHP™ Extender*
- *ValvKeep™*

# BOUNDLESS OPPORTUNITY.

**Our values define our culture.** The passion and expertise of our people drive our business. They are behind the reliable products, systems and services our customers use to deliver the power, gasoline, plastics and water that allow people to live their lives. They turn to Dresser because they trust our people to bring the quality, value, innovation, performance — and, above all, a commitment to helping them succeed.

Flow control. Measurement. Compression. Power. From upstream production all the way to local and retail distribution, Dresser delivers energy.
