

FOR IMMEDIATE RELEASE

Dresser Wayne iX Pay Secure Payment Upgrade Kits Now Available for Ovation, Vista, and Tokheim Premier B and C Fuel Dispensers

Retailers can meet PCI security regulations and protect customers from card fraud

AUSTIN, Texas (October 20, 2009) – Dresser Wayne® (www.DresserWayne.com), a global innovator of fuel dispensers and technologies, today announced that iX Pay™ Secure Payment upgrade kits are available for installed Ovation®, Vista®, and Tokheim® Premier® line fuel dispensers. These kits enable retailers to update equipment to meet Payment Card Industry (PCI) security compliance requirements. The upgrade kit for Vista dispensers includes a full bezel refresh.

Upgrade kits are now available for:

- All Ovation models
- All Vista models (1/Vista, 2/Vista and 3/Vista)
- Tokheim Premier B and C models

“These upgrades provide a seamless, affordable way for our retailers to protect their customers and their bottom lines against credit and debit card fraud” said Tim Weston, product manager for payment technologies at Dresser Wayne. “Installed Dresser Wayne and Tokheim dispensers can now be upgraded to the latest in Triple-DES (TDES) encryption, tamper-responsive components and skimming deterrents.”

iX Pay Secure Payment solutions ease the upgrade path today and provide flexibility for tomorrow. The kits were created specifically for these dispensers, leveraging Dresser Wayne’s decades-long experience in outdoor payment products, and feature a

refreshed user interface. These kits are also designed to be upgradeable to meet future security requirements, including PCI Unattended Payment Terminal (UPT).

The iX Pay Secure Payment terminal was the first device certified to the Version 2.0 security standard for both the PCI Encrypting PIN Pad (EPP) Security Requirements and Canada's Interac Association Chip PED requirements.

The Vista upgrade includes a full bezel replacement accentuating a large 5.4-inch display, softkey functionality, and enhanced push-to-start buttons. All of the kits allow retailers to increase security and payment processing capabilities, and extend the life of their dispenser investment.
