

Dresser, Inc.

FOR IMMEDIATE RELEASE

**Dresser's Flowgrid® Slam Shut Valves are used
in a pioneer flow limiting application
for the Indonesia National Gas Company**

Kuala Lumpur, Malaysia (November 2009) – Dresser, Inc. Asia-Pacific Operations announced the successful pre-commissioning of 34 Metering and Regulating stations sold by Dresser to PGN (Indonesia National Gas Company). Together with its local alliance partner PT One Connect in Indonesia, Dresser provided to PGN 78 units of Mooney Flowgrid pressure regulators integrated with its new Flowgrid® Slam Shut Valve. “PGN is very satisfied with the performance of the regulators and the support of the Dresser personnel during the commissioning of the skids,” stated Raymond Lam, Marketing Director of PT One Connect.

The Flowgrid® Slam Shut Valve is an automatic emergency shutoff device. It was used here with the Flowgrid pressure reducing regulator to provide secondary downstream pressure protection. The device is designed to shut off the flow of gas when the sense or outlet pressure in the system either exceeds or drops below the set point pressures. This is a pioneer application of the Flowgrid regulator in flow limiting applications, and also the first major supply of the Slam Shut Valve into this region.

This is the first Metering and Regulating Station project for Dresser and PT One Connect in Indonesia and bodes well for future project activity. Dresser Asia-Pacific General Manager, Gerard Stenson adds, “We have been involved through all phases of the project from design to pre-commissioning.” After conducting a Factory Approved Test in the fabrication yard in early September 2009, PGN stated that it is satisfied with the performance. Stenson continues, “We anticipate a follow up order from this customer later this year as phase II of their overall project is rolled out.”

About Dresser® products

Dresser products are highly engineered, technically superior and are designed to help global customers meet and exceed requirements for mission critical energy applications.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Consolidated® pressure relief valves, and ROOTS® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.
