## **Dresser® Announces Availability of its “Take Flight” Program for Customers Interested in Reducing Their Carbon Footprint**

### **Program Features Up to 120 Day-PLUS Trial of the Becker® ZERO BLEED™ Valve Regulator Pilot**

**Elk Grove Village, IL (July 30, 2010)** – Dresser today announced “Take Flight”, a global program that encourages the energy industry to evaluate and reduce its carbon footprint. This Dresser program offers customers a trial of the Becker® ZERO BLEED™ Valve Regulator Pilot (VRP) to install on their existing equipment to evaluate the reduction in fugitive emissions they can expect.

In most natural gas applications a control valve typically requires two pieces of instrumentation– a positioner and a controller. These two devices exhibit high rates of methane fugitive emissions, a potent greenhouse gas. According to the U.S. Environmental Protection Agency, high-bleed pneumatic controllers are among the largest sources of vented methane by equipment type in the oil & natural gas industry.

“The Becker VRP is the only piece of instrumentation on the market that combines the actions of both the positioner and a controller into a single device while completely eliminating greenhouse gas emissions” stated Greg Giernoth, Dresser Marketing Director for Becker Control Valves.

The “Take Flight” program offers up to 120-day trial, PLUS the shipping time to a customer’s evaluation location. During the Becker ZERO BLEED VRP trial, customers will be able to perform a full technical evaluation and assess the reduction of emissions at their installation site. Program details and specifications such as model selection and potential reduction in emissions can be obtained by contacting [takeflight@dresser.com](mailto:takeflight@dresser.com).

#### **About Dresser® products**

Dresser is a designer, manufacturer and distributor of natural gas measurement, pressure control and pipeline integrity products, service and repair. Dresser product

lines include: RCS<sup>®</sup> and Andco<sup>®</sup> actuators, Dresser<sup>®</sup> meters & instruments, Becker<sup>®</sup> control valves, Mooney<sup>®</sup> and RedQ<sup>®</sup> regulators, Texsteam<sup>®</sup> Pumps, Piping Specialties, FloSolutions<sup>™</sup> and Blackhawk<sup>®</sup> intervention solutions.

**About Dresser, Inc.**

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products, including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point-of-sale systems, and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne<sup>®</sup> retail fueling systems, Waukesha<sup>®</sup> natural gas-fired engines, Masoneilan<sup>®</sup> control valves, Consolidated<sup>®</sup> pressure relief valves, and ROOTS<sup>™</sup> blowers. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 150 countries.
