

Dresser Wayne® Receives Renewal of ISO 9001 Registration and OHSAS 18001 Certification for Safety and Business Management Systems in Czech Republic

LONDON, England (July 16, 2010) - Dresser Wayne (www.DresserWayne.com), a global innovator of fuel dispensers and technologies, has received renewal of its ISO 9001 certificate and OHSAS 18001 certification for exceptional business and health and safety practices in its Czech Republic sales and service facilities.

“It is great to see continual improvement in action. Dresser Wayne is a leader in technology, health, safety and business processes, and we are pleased to be recognized by independent international standards organizations for our quality management,” said Damian Tracey, president of Dresser Wayne EMEA. “Our approval for renewed certification in the Czech Republic reaffirms our commitment to leadership and ongoing improvement in our quality, health and safety programs.”

ISO 9001 outlines stringent standards for quality business processes worldwide, and is complemented by OHSAS 18001, a set of rules that requires continual advances in health, safety, and risk management. To obtain certification, companies must demonstrate rigorous management processes and meet customer-service, product-quality, and health and safety benchmarks. By achieving certification, Dresser Wayne has demonstrated ongoing improvement in these key areas.

Dresser Wayne’s achievement of these certifications communicates that customers can depend on consistent product and service quality. It also means that they can expect highly-trained service personnel focused on upholding high safety standards at their sites.

Dresser Wayne operates sales, service and manufacturing locations around the world, including the Czech Republic site that employs 75 people. The company is dedicated to providing fuel retailers with leading-edge technology, new product innovations that are inspired by consumers, and environmentally sustainable solutions to help them successfully meet consumer demands while complying with industry regulations and standards.

“We all have a role in improving the environments in which we work,” said Kevin Burnett, senior director of Global Operational Excellence, Dresser Wayne. “Being a global industry leader comes with the added responsibility of being a leader in safety, health and business quality. We are excited that we can once again confirm what our customers around the world already know about us: Dresser Wayne is dedicated to providing customers with excellent, reliable products manufactured in safe and healthy work environments.”
