**FOR IMMEDIATE RELEASE**

**Aeration Blower Package  
Is Performance Pre-Engineered**

The Dresser ROOTS™ EASYAIR® X2 package system provides comprehensive performance engineering allowing you to configure a solution to your unique application. The heart of the package is a 50 cfm to 5000 cfm two or three lobe splash lubricated blower built to exacting standards right here in America. This well balanced and reliable machine is mounted on a unique baseplate with integral silencing and driven by a high efficiency motor with v-belt drive. Maintenance is optimized via ergonomically designed panels in the acoustic enclosure. The enclosure is designed for up to 22 dBA free field attenuation and can be equipped with standard instruments or the ROOTS™ IntelliView® Control system. Combine the ROOTS™ EASYAIR® X2 with a variable speed drive and IntelliView® Controls to effectively optimize your plant's dissolved oxygen, reduce your energy expense for aeration and maintain compliance. Come by booth number 4818 and see how easy the ROOTS™ EASYAIR® X2 factory blower package system can satisfy your Wastewater and Water Treatment needs.
